

Morpho - Bug #4975

Morpho can't handle docid prefix containing a period

05/04/2010 09:53 AM - Jim Regetz

Bugzilla-Id:	4975		

Description

A user just reported mysterious problems attempting to save and reopen documents in Morpho. It appears the problem is that her prefix contains a period, impairing Morpho's ability to parse the document id.

Steps to reproduce:

- Create a new profile, choosing a prefix that contains a period (foo.bar)
- Create a new data package, and save locally
- Restart Morpho

The saved package doesn't appear in the Open Data Package window.

Also, .morpho/profiles/foo.bar/data looks like this:

```
`-- foo
`-- bar.3.1
```

Rather than this:

```
`-- foo.bar
`-- 3.1
```

Either Morpho needs to be smarter about parsing IDs, or if such a prefix is illegal, it shouldn't allow users to create one containing periods in the first place (and this should be documented).

History

#1 - 05/04/2010 09:57 AM - ben leinfelder

I'm pretty sure this has come up before. We're already preventing the use of "temporary" as a prefix. I believe Metacat does not allow periods in the docid scope as well.

#2 - 05/04/2010 10:41 AM - ben leinfelder

periods not allowed anymore.
help/error text indicates such.
