

Kepler - Bug #4991

Kepler-2.0-RC2 fails to start for a non-admin user after admin install

05/07/2010 06:39 PM - Christopher Brooks

Status:	Resolved	Start date:	05/07/2010

Description

I installed Kepler as admin under Windows 2003 and the installation works fine.

If I try to start Kepler as a non-admin user, it appears to start up and then exit?

Running kepler.bat as a non-admin user fails:

```
C:\PROGRA~1\Kepler-2.0-RC2>.\kepler.bat
Exception in thread "main" java.io.FileNotFoundException: C:\Program Files\Kepler-2.0-RC2\build-area\present.txt (Access is denied)

at org.kepler.build.runner.Kepler.main(Kepler.java:76)
```

```
C:\PROGRA~1\Kepler-2.0-RC2>
```

Running kepler.exe just returns.
