

Kepler - Bug #4993

Kepler-2.0 cannot be built under windows because of apple-extensions

05/07/2010 06:47 PM - Christopher Brooks

Status:	Resolved	Start date:	05/07/2010

Category:	build system	Estimated time:	0.00 hour
Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	4993		

Description

The instructions at <https://kepler-project.org/developers/teams/build/systems/build-system/extension-build-system> fail because of apple-extensions

```
If, under Windows Server 2003, I do:
mkdir kepler-2.0
cd kepler-2.0
svn co https://code.kepler-project.org/code/kepler/releases/release-branches/build-area-2.0/ build-area
cd build-area
ant change-to -Dsuite=kepler-2.0
ant run
```

I get:

```
[compile] Compiling apple-extensions-2.0...
[compile] C:\tmp\cxh\src\kepler-2.0\build-area\build.xml:31: warning: 'includeantruntime' was not set, defaulting to build.sysclass
asspath=last; set to false for repeatable builds
