

Kepler - Bug #4996

2.0-RC2 demos don't work

05/09/2010 09:55 PM - Christopher Brooks

Status:	Resolved	Start date:	05/09/2010

Blocked by Kepler - Bug #4943: RC5 Installer Tracking Bug		Resolved	04/19/2010

History

#1 - 05/09/2010 10:18 PM - Christopher Brooks

It looks like a version change from 2.0 to 2.0.0 is causing problems.
I removed my KeplerData directory and installed Kepler-2.0-RC2, which created

```
bash-3.2$ ls ~/KeplerData/  
Kepler-2.0.0-Demos  modules      workflows
```

A bunch of demos fail because 2.0 vs 2.0.0. This is similar to bug [#4994](#). What we ship in Kepler-2.0-RCn should have the same version numbers as is in the kepler-2.0 svn branch. In Kepler-2.0-RC2, the modules have a version number of 2.0.0:

```
bash-3.2$ ls /Applications/Kepler-2.0-RC2/Kepler.app/Kepler/  
actors-2.0.0      demos          module-manager-2.0.1  
apple-extensions-2.0.0  directors-2.0.0  module-manager-gui-2.0.0  
authentication-2.0.0  ecogrid-2.0.0   opendap-2.0.0  
authentication-gui-2.0.0  event-state-2.0.0  outreach-2.0.0  
build-area      gui-2.0.0      ptolemy-8.0.0  
common-2.0.0    io-2.0.0      r-2.0.0  
component-library-2.0.0  job-2.0.0      repository-2.0.0  
configuration-manager-2.0.0  kepler-2.0.0  sms-2.0.0  
core-2.0.0     kepler-tasks-2.0.0  ssh-2.0.0  
data          kepler.jar     util-2.0.0  
data-handling-2.0.0  kepler.sh  
dataturbine-2.0.0  loader-2.0.0
```

In the Kepler-2.0 branch, the modules have a 2.0 version number:

```
bash-3.2$ ls ~/src/kepler-2.0  
Kepler.app      directors-2.0    loader-2.0  
actors-2.0      ecogrid-2.0     module-manager-2.0  
apple-extensions-2.0  event-state-2.0  module-manager-gui-2.0  
authentication-2.0  gui-2.0         opendap-2.0  
authentication-gui-2.0  io-2.0         outreach-2.0  
build-area      job-2.0         ptolemy-8.0  
common-2.0      kepler-2.0     r-2.0  
component-library-2.0  kepler-tasks-2.0  repository-2.0  
configuration-manager-2.0  kepler.bat     sms-2.0  
core-2.0       kepler.exe     ssh-2.0  
data-handling-2.0  kepler.jar     util-2.0  
dataturbine-2.0  kepler.sh
```

ENM/GARP_MultipleSpecies-V.xml fails:

```
ptolemy.kernel.util.IllegalActionException: Cannot open file or URL  
in .GARP_MultipleSpecies-V.Get Species/Location information.Line Reader.fileOrURL

#2 - 05/20/2010 04:25 AM - David Welker

These demos now work. There might be others that are failing under RC3, but I have tested all of the demos in getting-started, the two relevant ones in ENM, and R. If so, we can open a new bug for those.
