

Kepler - Bug #5009

Opening two KARS that have the same Workflow, but that have different report layouts, will make the first layout refresh itself with the layout from the KAR that was opened most recently.

| Description | | | |
| If you open two KARS associated with the same Workflow, but that have different report layouts, the report layout is the first workspace will change to the one that is in the most recently opened KAR file. | | | |
| Is related to Bug #4977 | | | |

History

#1 - 05/14/2010 02:55 PM - debi staggs

This is because there can be multiple KARS that depend upon the same workflow, but have been saved with different report layouts. When a report layout is opened, it currently only looks up the workflow Isid and nothing else, and has no way to associate an array of reports with a single workflow, and know which one should be used for the currently selected frame.

#2 - 05/17/2010 12:07 PM - Derik Barseghian

Retargeting - this seems like something we should fix for wrp-2.0. It's possible to open a KAR, redesign the report, and then open another KAR and lose the redesigned report when it's refreshed.

#3 - 05/20/2010 12:56 PM - Derik Barseghian

I spent a bit looking into this last night. I was able to keep the report layout from refreshing in the window in which it shouldn't, but this isn't enough. When you execute, the old report layout is still used (instead of the one shown) -- so this ends up being more confusing/worse. To really solve this problem, some refactoring needs to be done in a few places for Workflow to truly be keeping track of different report layouts per workflow. This isn't hard. However, there are places, like in the reporting kar entry handlers, where reporting only has a workflow Isid to work with, but additional context is needed to be able to know which report for this workflow to use. This might mean keeping a mapping of reportlayout to frame/window/whatever. Doing this, and in a way that works for both gui and headless, might be non-trivial, and seems likely to introduce bugs along the way. At this juncture we may want to leave this bug in, and retarget to wrp-2.x.y....

#4 - 06/07/2010 08:49 AM - debi staggs

Based on Deriks comments, re-targeting to wrp-2.x.y for now.

#5 - 06/30/2010 06:17 PM - Derik Barseghian

retargeting

#6 - 07/06/2010 02:06 PM - Derik Barseghian

Should be fixed in 2.0 now at r25056. Needs to be merged into trunk.

#7 - 02/01/2011 03:02 PM - Derik Barseghian

I merged a long time ago, just tested on trunk and works.

#8 - 03/27/2013 02:28 PM - Redmine Admin

Original Bugzilla ID was 5009
