

Kepler - Bug #5018

Items with the same LSID show with the same name in the Components Library

05/19/2010 04:36 PM - Derik Barseghian

Bugzilla-Id:	5018		
Description If you have two items within a KAR that have different filenames but the same LSID, they show as one item in the components tree, even though the KAR actually contains two files (and the View Manifest reflects this). If the two items with the same LSID are in different KARs, the components tree will show one in each KAR, but they will share the same name, even if the filenames are different.
