<b>Bugzilla-Id:</b>	5038		
<b>Description</b>			
<p>Assessments uploaded to the Bepin server via Morpho are visible under Morpho interface as a saved data package. But, the same assessment is shown to have ZERO items when viewed on the FIRST website!</p> <p>e.g., 2007F_BS111_Exam1 (moyerbrailean.452.18) and Jay_BS111_2007Fall_Exam1 (jlee.4079.4)</p> <p>This happens especially when an assessment is re-opened for edits and saved on to the server.</p>			

History

This was happening because the server has a much higher dicid revision than what the local Morpho system had for the questions. I "faked" editing the assessment items until the revision was greater than what was on the server and saved to Metacat afterward. Now you can see the assessment items for moyerbrailean.452. Unfortunately the data file is slightly corrupt in that the quesitonids it references are not valid. The student data needs to be re-imported.

I've done a similar thing for jlee.4079. You can now see the assessment items via the web. The datafile for this assessment seems to be missing and should be reimported.
