<b>Description</b>			
The tagging docs (tagging-2.0 > docs) need to be named tagging.pdf instead of kepler-tagging-ui.pdf			
This is so that they can be displayed in the list of 'available documentation' for the modules.

I don't think kepler-tagging-ui.pdf is the documentation. I think it's some early design documents. They should probably be removed from the docs directory before shipping.
