<b>Bugzilla-Id:</b>	506		

#### Description

1) create an eml-software module in Morpho. Under "originator->CHOICE" select the "positionName" radio button and enter a value for positionName. Save the module.

2) Go back and edit the module using Morpho's xml editor. Under "originator-CHOICE" select the "individualName" radio button instead of "positionName", and enter values for "salutation, surname and givenName". click "Save Changes". Morpho does not show any errors, and appears to save the module successfully.

3) Go back and open up the module again, using Morpho's xml editor. Under "originator->CHOICE", the "positionName" radio button is selected again - the "individualName" selection is lost, and the values for "salutation, surname and givenName" are also lost.

(Morpho was not connected to Metacat during these operations. Same problem in JDK 1.3 & 1.4 on winXP)

#### History

##### #1 - 10/10/2002 02:16 PM - Dan Higgins

DTD for the eml-software module contained a typo for the originator element that did not allow multiple choices. The DTD has been corrected to match that used in other modules.
