#### Description

when creating an eml-protocol module for the first time, the elements "paragraph" and "citation" appear in the correct order beneath the "qualityControl" element (ie Morpho reads them from the DTD OK - no data entered yet)

if data is entered in "paragraph" and/or "citation" and the protocol module is saved, morpho actually saves "paragraph" and "citation" in the wrong order within the XML document.

I tried editing the XML to put them back in the correct order, and next time I edited the protocol module in Morpho, it saved them in the **correct** order.

(So in summary, if these elements don't already exist and are created, morpho saves them in the wrong order, but if they do already exist in the correct order, morpho maintains that correct order OK)

#### History

##### #1 - 10/11/2002 02:08 PM - Dan Higgins

corrected a typo in the eml-protocol dtd (with included originator tag). This apparently fixes the problem indicated with this bug.

##### #2 - 03/27/2013 02:14 PM - Redmine Admin

Original Bugzilla ID was 507
