This is works now: the output port for sensor sample data, and two input ports for turning sensor on/off, and setting sampling rate.

I'll create some demo workflows and then close the bug.

#2 - 09/24/2010 03:53 PM - Daniel Crawl

I created a demo workflow where the data values determine the sampling rate of a sensor. It's in sensor-view/workflows/demos/change-sampling.kar.
