

Kepler - Bug #5082

Eclipse build fails because of invalid archive

07/07/2010 05:25 PM - Christopher Brooks

Bugzilla-Id:	5082		

Description

Under Windows Server 2003, I was building the devel tree as per the instructions at

<https://kepler-project.org/developers/reference/kepler-and-eclipse>

and I got:

Invalid archive:

src/lib/swing-workers-license.htm

src/lib/ptll.properties.in

History

#1 - 08/05/2010 04:27 PM - jianwu jianwu

I believe the bug is because of an extra space in one line of Eclipse.java. Now (at version 25232) ptll.properties.in, ptll.properties and swing-workers-license.htm will not included in .classpath of ptolemy module.
