Description

I'm trying to report on a record token. I make a simple workflow with `{{data = 1, timestamps = 2}}` pasted in a Constant, and add Constant's output to my report design, but on execution get this error:

(Location of error unknown)org.apache.fop.fo.ValidationException: Error(Unknown location): fo:table-body is missing child elements.
Required Content Model: marker* (table-row+|table-cell+)

and a popup error.

I found someone w/ a similar error that garnered this response:

<http://marc.info/?l=fop-user&m=120819139826155&w=2>

History

#1 - 07/20/2010 12:42 PM - Derik Barseghian

Should be fixed in 2.0 at r25111.

Leaving open for testing and until checked into trunk.

#2 - 07/22/2010 10:58 AM - ben leinfelder

was this because I was assuming there was more than one value per label (ie an ArrayToken)?

#3 - 07/22/2010 11:13 AM - Derik Barseghian

Yeah, it was assumed that each value of a RecordToken's subtokens were ArrayTokens -- casted without checking.

#4 - 07/22/2010 11:16 AM - Derik Barseghian

I checked this fix into trunk at r25112

#5 - 03/27/2013 02:29 PM - Redmine Admin

Original Bugzilla ID was 5096
