Semtools - Bug #5135

Loading ontology from local file does not seem functional

08/09/2010 04:32 PM - ben leinfelder

Target version:	morpho-plugin-0.9.0		**Spent time:**	0.00 hour
Bugzilla-Id:	5135			

Description

Tried to use the logical/physical mapping of managed ontologies in Morpho, but the ontology did not load. Perhaps it needs to be prefixed with file:\\ or some such. Will investigate.

History

#1 - 04/08/2011 03:57 PM - ben leinfelder

Local resources need file:// prepended in order to load.
This should probably be a file browser to make it easier to select a local resource.
This also assumes that any other ontologies that your local resource imports are either:
1. available at their URI
2. previously mapped to a local resource. All imported URIs must be mapped to local files if there is no internet connectivity or if the URIs do not otherwise resolve to ontology contents.

This could be improved in that there are currently no prompts or error messages about unmapped URIs if they fail to load.
