<b>Category:</b>	sensor-view	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	sensor-view-0.9.0	<b>Spent time:</b>	0.00 hour
<b>Bugzilla-Id:</b>	5169		

#### Description

The Component Preferences tab only allows a single remote repository to be selected at a time. By selecting more than one repository:

- component searches span multiple repositories
- when uploading a wf, user is asked which repository
- display multiple scheduling servers as shown in Fig 7

#### History

changing bugs from REAP to Kepler product

##### #2 - 02/15/2011 06:39 PM - Derik Barseghian

You can select multiple remote repositories for search, but not save, and this seems fine, I don't think we should promote putting the same kar on multiple repositories. Can we close this?
