

Kepler - Bug #5170

uploading a workflow requires a refresh

09/03/2010 12:48 PM - Daniel Crawl

Status:	New	Start date:	09/03/2010
Priority:	Normal	Due date:	
Assignee:	Derik Barseghian	% Done:	0%
Category:	general	Estimated time:	0.00 hour
Target version:	2.X.Y	Spent time:	0.00 hour
Bugzilla-Id:	5170		
Description			
When a workflow is uploaded to a remote repository, the component tree must be searched again before the workflow appears. It'd be nice if the workflow appeared when the upload completed.

Retargeting after discussion w/ Matt and Jing. If we do this, we might take also consider refreshing the tree in other similar scenarios, e.g. kars appearing in "local repository" folders (MyWorkflows) out of (Kepler) band, etc.
