Bugzilla-Id:	5180		
Description			
After discussion with Christopher: add a File menu Export option that does what the old Save As used to do, a save as for the model xml.

Done. You need to delete KeplerData/modules/gui/configuration/uiMenuMappings_en_US.xml if you have one. I believe tagging module is the only thing that serializes this file now, and since tagging hasn't been released, 2.0.0 users will be fine.
