

Kepler - Bug #5186

Publish example KARs to repository

09/16/2010 02:10 PM - Derik Barseghian

Status:	Resolved	Start date:	09/16/2010
Priority:	Normal	Due date:	
Assignee:	Derik Barseghian	% Done:	0%

Target version:	2.3.0	Spent time:	0.00 hour
Bugzilla-Id:	5186		

Description

The two KARs on the kepler library were published inadvertently, and may and should be removed, because they are not good examples.

We should also publish some good examples (using 2.1, so they are KAR 2.1) for users to see.

Matt suggests:

REAP examples

SANPark examples

some useful components

Publishing a run kar that includes a nice report (sanparks?) would be good too.

History

#1 - 09/16/2010 05:10 PM - Derik Barseghian

Removed the 2 kars.

Changing title, we just need to publish example kars now.

#2 - 09/30/2010 05:55 PM - Derik Barseghian

I tweaked and uploaded four REAP workflow kars.

Turns out the SANParks example Ben and I wanted to post (pc03-veld-condition-woody.kar) uses a protected data set, so it's not a good public example. He's looking for another.

If you have good example workflows or components to put up, please do.

I recommend filling in the component's documentation, author, and version sections since they're displayed.

I also strongly recommend creating your example kars from within kepler 2.1.0, so that complete versioning information is captured in the kar.

This is orthogonal to the release and is not a release blocker. Derik can upload new KARs whenever he likes. Retargetting to 2.3.

#4 - 07/08/2011 06:33 PM - Derik Barseghian

I documented and uploaded 4 example REAP KARs right after 2.2 shipped. This is still sparse, I encourage others to put up examples.
