**Description**

The user should be warned to design a report and upload it if there isn't a report when scheduling. Matt think this part of the system is not obvious.

## History

**#1 - 11/16/2010 03:21 PM - Jing Tao**

Talked with derik and knows: if a kar file has a reporting module, the according karxml will have something looking like:

<karEntry>
<karEntryAttributes>
.................
<type>org.kepler.reporting.roml.ReportLayout</type>
</karEntryAttributes>
....
</karEntry>

So we can determine if a kar has reporting module by type.contains("ReportLayout").

**#2 - 11/16/2010 06:09 PM - Jing Tao**

In KarXml class, code was added to see if it has a report karEntry.

For the remote workflows, user will be given a warning if he/she schedules a workflow without reporting.

We will work this on local workflows when the new feature user can schedule a local workflow is done.

**#3 - 11/24/2010 05:13 PM - Jing Tao**

When user schedule a local workflow, user will be given a warning during uploading workflow process if the workflow has no reporting layout.
