

Kepler - Bug #5235

Scheduler GUI can schedule any wf (even local ones).

<b>Bugzilla-Id:</b>	5235		
<b>Description</b> Current scheduler only being able to schedule wfs that have already been uploaded seems limiting. A better model would be to allow the user to schedule any wf (even local ones), but then prompt them that it will have to be uploaded to continue if its a local WF.			

History

#1 - 02/02/2011 01:09 PM - Jing Tao

When user tries to schedule a local workflow, it will be uploaded to the saving repository first. The functionality is done.
