Category:	morpho - general		**Estimated time:**	0.00 hour
Target version:	1.10.0		**Spent time:**	0.00 hour
Bugzilla-Id:	5264			

Description

Add support for editing EML 2.1.1 with multiple language translations included in various EML elements

---

History

#1 - 12/29/2010 04:13 PM - ben leinfelder

Morpho is now opening and upgrading older EML documents to EML 2.1.1 namespace (since it is backwards compatible).

#2 - 12/29/2010 04:15 PM - ben leinfelder

Added dataset title translations to the interface to test the approach - seems feasible so far.
Added a button next to the "Title" text field that will open a dialog with one of our standard "Custom List" editors that is used for keyword entry. You can specify multiple values and the language they are in.
(The language field is currently free-text, but the xml:lang attribute is strict about how those entries should be made, ie: "en-US")

#3 - 01/27/2011 11:49 AM - ben leinfelder

added translation handling for: surName, givenName, organizationName

#4 - 01/17/2013 10:52 AM - ben leinfelder

This has been in Morpho since 1.10.0

#5 - 03/27/2013 02:29 PM - Redmine Admin

Original Bugzilla ID was 5264
