

Kepler - Bug #5270

No menu bar and labels when non-default locale is set

01/11/2011 02:11 AM - Tomasz Å»ok

<b>Bugzilla-Id:</b>	5270		

**Description**

When system's locale is set to other value than en\_US, then Kepler starts without menu bar and buttons don't have labels on them. Attached screenshot is from run on my default settings (ie. pl\_PL).

It should use default language settings if the present one does not have UI mappings.

To reproduce (eg. under Linux):  
\$ export LANG=pl\_PL.utf8  
\$ ant run

History
