Kepler - Bug #5285

NPE on restart using newly created suite

01/31/2011 02:00 PM - Derik Barseghian

Status:	New		**Start date:**	01/31/2011
Priority:	Normal		**Due date:**	
Assignee:	David Welker		**% Done:**	0%
Category:	module manager		**Estimated time:**	0.00 hour
Target version:	Unspecified		**Spent time:**	0.00 hour
Bugzilla-Id:	5285			

Description

User reports being unable to restart with their own suite that depends on the provenance suite:

"Debugging shows me that after adding any new Module using module manager->Selected Modules, the second time when the method ' RepositoryLocations. initReleaseLocation()' was called for loading "module-manager" it returned null (line no 24)."
