Description			
<p>At some point some months ago, I noticed report pdfs having transparent, instead of white, backgrounds, which make them hard to read. With certain viewers you can't tell, but with Photoshop and os x's Preview you can. I see they're transparent in trunk and 2.1.0. I'm not sure if they've always been this way and it's just that Preview was updated, or if it's due to a change in reporting.</p>			

History

#1 - 02/08/2011 06:06 PM - Derik Barseghian

fixed at r27060. The margins (or whatever they're called) around the report are still transparent, but I guess that's ok since no content goes there.

#2 - 02/14/2011 02:27 PM - Derik Barseghian

Changing title and re-opening as an ER for the margins.
