<b>Description</b>			
This is really annoying when you're trying to delete items from a long report design; with each delete you lose your place.

basically fixed with r26988, but not quite satisfied with the location you're scrolled to when you delete an item. look at this in more detail, see the notes in ReportDesignerPanel:

```
// XXX find suitable replacement for hardcode 100
```

I've used this more after the fix I made and it seems fine.
