

Kepler - Bug #5314

Closing last workflow window closes Kepler application

02/18/2011 05:58 AM - Michal Owskiak

Status:	New	Start date:	02/18/2011
Priority:	Normal	Due date:	
Assignee:	David Welker	% Done:	0%
Category:	general	Estimated time:	0.00 hour
Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	5314		
Description			
This is not compatible with Mac OS X way of closing windows.			
After last window is closed, application should remain running unless user explicitly presses Command-Q or chooses Kepler -> Quit
