Category:	metacat		**Estimated time:**	0.00 hour
Target version:	Unspecified		**Spent time:**	0.00 hour
Bugzilla-Id:	5316			

Description

The interactive map, for example

http://knb.ecoinformatics.org/knb/style/skins/nceas/map.jsp

doesn't work with firefox. The "loading map" text is displayed forever without any map appearing.

Has duplicate Metacat - Bug #2188: replace web client with OpenLayers	**Resolved**	**09/06/2005**

History

#1 - 02/22/2011 09:46 AM - ben leinfelder

This is a known issue with the old MapBuilder interface used to render the spatial layers in Metacat 1.9.x.
The forthcoming 1.10 Metacat release addresses this issue by using OpenLayers as the rendering engine - an actively developed API with wide support for the latest browsers.
