| Target version: | 2.2.0 | Spent time: | 0.00 hour |
| Bugzilla-Id: | 5328 | | |
| Description | | | |
| On mac 10.6 and windows XP, both with java 1.6, I can't get the standalone module manager application to start. On windows I tried both shortcuts and the executable itself. I didn't have this problem in the last rc. | | | |
