

Morpho - Bug #533

new File|Open to accomodate new UI design

06/13/2002 09:39 AM - Matt Jones

Target version:	1.2	Spent time:	0.00 hour
Bugzilla-Id:	533		

Description

The "File|Open..." menu will now display a list of data packages that are owned by the user in a dialog box. This replaces the current "ownerQuery" panel that is displayed in the main morpho content pane. The dialog will have a radio button that lets the user switch between displaying all owned packages, just those that are local, or just those on metacat. Be sure to consider how this list can be configured to use hierarchical folders as described in bug 306. When selected, the package will be opened in a window as described in bug 532.

The search window will produce result lists that are structured in the same way as the open dialog (again, see bug 306). When one does a search, double clicking on a search result (a package) should open it in the same way that the File|Open dialog works.

- Bug 534 has been marked as a duplicate of this bug. ***

#2 - 07/09/2002 09:59 AM - Matt Jones

Need to redesign or eliminate icons for this new view of the data (bug 356). Also note the new dependency on bug 306 in terms of creating folder views.

File|Open dialog is in morpho now. It looks as same as our design and functionalities works fine.
