Kepler - Bug #5339

In Database Query actor, the output port will be string type if you choose the output type to be "record"

03/03/2011 06:05 PM - Jing Tao

Description
Derik and I found that the type of the output port is string even though we chose "record" as the output type.

History

#1 - 03/03/2011 06:10 PM - Jing Tao

We used the Display to show the result. The result looks like a record: {ID = "gpp/CR800_sensor0", LASTTIME = "2011-03-03 13:48:19"}.
But when we connected it to RecordDisassembler actor, we got an error saying "type doesn't match" during the execution.
