Target version:	metacat-plugin-0.9.0	Spent time:	0.00 hour
Bugzilla-Id:	5365		
<b>Description</b> Include interace for expressing context criteria for a semantic query. The query syntax allows context criteria, but there is no GUI for it. The criteria assume a basic context template rather than any specific entity (because of the general nature of the query there is not a concrete observation before submitting the query). Context is defined as <Entity> <Relationship> <Entity> and can be combined to further expand/refine context conditions. The classes are expanded using the ontology as you would expect.
