

Semtools - Bug #5372

Update annotation entries when updated in Metacat

04/04/2011 02:33 PM - ben leinfelder

Status:	Resolved	Start date:	04/04/2011
Priority:	Normal	Due date:

Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	5372		

Description

There is a new MetacatEventService that allows components (SemtoolsPlugin) to register as a listener for MetacatEvents that occur like 'insert', 'update', and 'delete'.

Annotations are added or removed as appropriate when these actions take place in Metacat. So a save in Morpho to Metacat makes the annotation available for query immediately.

History

Other components (DataONE) could also use this mechanism. EventLogging might also make use of this model as well as the ReplicationService
