

Semtools - Bug #5374

Use 'semquery' within Morpho

04/04/2011 03:26 PM - ben leinfelder

Status:	New	Start date:	04/04/2011
Priority:	Normal	Due date:	
Assignee:	ben leinfelder	% Done:	0%
Category:	Morpho Plugin	Estimated time:	0.00 hour
Target version:	morpho-plugin-0.9.0	Spent time:	0.00 hour
Bugzilla-Id:	5374		
<b>Description</b> Instead of loading all remote annotations from Metacat into Morpho before performing the semantic query, Morpho should just generate a semquery and submit it to Metacat and process those results. As a prototype it was fine to load all the remote annotations, but as the number of annotations increases, it will not be feasible to load them all on every client.			

History

When the semquery and keyword and spatial queries are integrated in Metacat, Morpho should also make use of this service for it's querying.
