

Kepler - Bug #5432

2.2 mac installer contains 2 copies of everything

06/28/2011 12:32 PM - Daniel Crawl

Status:	Resolved	Start date:	06/28/2011
Priority:	Normal	Due date:	
Assignee:	David Welker	% Done:	0%
Category:	installer	Estimated time:	0.00 hour
Target version:	2.3.0	Spent time:	0.00 hour
Bugzilla-Id:	5432		

Description

There is a zip file in each module containing the contents of the module.

I would not create a new installer for 2.2, since it has already been released, but the next installer should not contain these duplicates.

History

#1 - 08/11/2011 06:08 PM - Derik Barseghian

Should be fixed at r28248 in trunk and r28249 in 2.3 branch.
Will close when I verify it works with mac installer built from 2.3.0

#2 - 08/12/2011 08:05 PM - Derik Barseghian

That did seem to do the trick. Closing.

FYI size of test 2.3 installers:

```
rw-r--r--@ 1 derik derik 225M Aug 12 19:59 Kepler-2.3.dmg
rw-r--r-- 1 derik derik 219M Aug 12 20:02 kepler-2.3-linux.tar.gz
rw-r--r-- 1 derik derik 222M Aug 12 20:03 Kepler-2.3-win.jar
```
