

Kepler - Bug #5436

KeplerConfigurationApplication does not show run exception

06/30/2011 04:47 PM - Daniel Crawl

Status:	Resolved	Start date:	06/30/2011
Priority:	Normal	Due date:	
Assignee:	David Welker	% Done:	0%
Category:	execution engine	Estimated time:	0.00 hour
Target version:	2.4.0	Spent time:	0.00 hour
Bugzilla-Id:	5436		

Description

KeplerConfigurationApplication does not show exceptions that occur during workflow execution.

To reproduce:

kepler.sh -nogui run-error.xml

shows no error, but:

kepler.sh -nogui -nocache run-error.xml

does:

```
[null] Command failed: ptolemy.kernel.util.IllegalActionException: Model triggered an exception.  
[null] in .run-error.Throw Exception
```

-nogui uses KeplerConfigurationApplication

-nogui -nocache does not use KeplerConfigurationApplication
