

SciencePipes - Bug #5465

make SciencePipes licensing compatible with Kepler

08/16/2011 12:34 PM - Derik Barseghian

Status:	New	Start date:	08/16/2011
Priority:	Normal	Due date:	
Assignee:	Derik Barseghian	% Done:	0%
Category:	general	Estimated time:	0.00 hour
Target version:	DRD project end	Spent time:	0.00 hour
Bugzilla-Id:	5465		
Description			
Paul is ok with licensing SciencePipes as BSD.			
*Need to create the license file(s).			
*Go through SciencePipes JARLib finding and checking JAR licenses, creating a list of JARs and their licenses ala other Kepler modules.			
*MXGraph should not be checked into the Kepler repository. We either need to check with them re: a similar free for non-profit use license that can be used for Kepler, find a substitute library, or some other solution.

History

#1 - 08/19/2011 02:06 PM - Derik Barseghian

Planning to use the BSD 3-clause. Paul let me know if you prefer a different version.

BSD 3-clause is fine with me.

#3 - 08/30/2011 11:40 AM - Derik Barseghian

Matt suggests using Maven's license check tool.
