Target version:	reporting-2.3.0	Spent time:	0.00 hour
Bugzilla-Id:	5486		

Description

Since we decided not to provide a default scheduler and workflow run engine for the kepler release, we should have some information panel to let user know how to install them and how to configure them in kepler when he/she click the scheduler menu if the setup hasn't been done.

Hey Jing, I think you're done with this one, yeah? Can you close or update w/ status?

#2 - 12/01/2011 09:20 AM - Jing Tao

Yes. this one is done. User will be notified to set up the scheduler and the workflow run engine when they click the schedule menu item if those components are not set up yet.
