Description

REOT described a need for summary graphs and stats from within Morpho without breaking out to a distinct package. This feature is closely related to the capabilities that we are working on in Monarch, and we should seriously consider how we can incorporate a basic runtime with Morpho to produce these simple types of output. We might just allow Monarch to be run and configured from within Morpho, and the output displayed in Morpho. We'll develop these features as part of Monarch, and use this bug to track the incorporation of the features into Morpho.

History

#1 - 11/06/2002 01:28 PM - Matt Jones

Depends on Monarch work advancing. Postponing until monarch is further along.

#2 - 03/27/2013 02:14 PM - Redmine Admin
