<b>Bugzilla-Id:</b>	5537		
<b>Description</b>			
Instead of using the SSL client certificate secured /replication servlet to administer replication settings via the web, we should move this to the more open /admin servlet that only requires us to be logged in as an admin user (no client cert or SSL required). This lets us require a client certificate for URLs that go to the /replication servlet and will give us greater security in replication.			

### History

---

#### #1 - 11/23/2011 01:07 PM - ben leinfelder

There is now a separate /admin screen for replication configuration. Now /replication can require SSL client certificates

#### #2 - 03/27/2013 02:30 PM - Redmine Admin

Original Bugzilla ID was 5537
