Target version:	EML2.0.0rc1	Spent time:	0.00 hour
Bugzilla-Id:	556		
Description			
We need to change the namespaces in EML 2 to include the text 'ecoinformatics.org'. This will ensure uniqueness.			

History

#1 - 08/22/2002 08:06 AM - Chad Berkley

We agreed to this change in the conference call on 8/21/02. Chad is going to do this.

#2 - 08/22/2002 02:18 PM - Chad Berkley

I changed the namespaces to be ecoinformatics.org:eml:modulename. I'm not sure if this is kosher or not. I looked around and I couldn't find anything that forbids it. It seems logical to me and no parsers seem to complain. I'll leave this bug open in case someone has a reason that this is a bad idea or has a better idea.

#3 - 08/22/2002 02:36 PM - Matt Jones

I think a more traditional format would be something like this:

```
eml://ecoinformatics.org/modulename
```

This would put it into the "eml" scheme if it were a URL. Do you have any objections to that rearrangement?

#4 - 08/22/2002 02:47 PM - Chad Berkley

ok. That's fine. I've changed it to eml://ecoinformatics.org/modulename

#5 - 09/03/2002 11:38 AM - Chad Berkley

done
