Kepler - Bug #5575

open composites from outline tab

02/15/2012 01:44 PM - Daniel Crawl

Description

A user requests the ability to open composite actors from the Outline tab. This would allow opening deeply nested composites without having to open all the intermediate ones.

I noticed there's no context menu for the Outline tab, but there is for the Components tab. Is this intentional?

History

#1 - 03/14/2012 11:51 AM - Daniel Crawl

This was implemented by Philippe Huynh. I also added a menu item to center the canvas on the selected actor.
