

Kepler - Bug #5579

Upload to Repository on actors doesn't work

03/06/2012 02:19 PM - Derik Barseghian

Status:	Resolved	Start date:	03/06/2012

Target version:	2.4.0	Spent time:	0.00 hour
Bugzilla-Id:	5579		

Description

If you right-click on an actor and select Upload to Repository, you get an Error:
There was a problem uploading the metadata.

I tried a customized RExpression, a Display, and a Composite. I've hacked my local configs to include kepler-dev, to where I tried to upload.

Hi, Derik:

I just uploaded the Display actor to kepler-dev successfully:

<http://kepler-dev.nceas.ucsb.edu/kepler/metacat?qformat=kepler&sessionid=0&action=read&docid=15542.18.1>

It is from kepler-2.3.0 release. What version of kepler did you use?

#2 - 03/06/2012 03:05 PM - Derik Barseghian

Excellent, hopefully there's just something wrong with this mac's 2.3.0 instance -- to be honest I'm not certain what local changes I have.

I just successfully uploaded a customized RExpression from ubuntu kepler-2.3.0.

I'll try again on my mac when I can and hopefully close this...

#3 - 03/06/2012 03:11 PM - Jing Tao

I just tried on Mac. It worked as well.
