Description

When you import a Site Layout, a workflow with DE Director is automatically created. The instantiated DE Director has no documentation.
DE Directors instantiated by dragging from the Component Library have documentation.
From Tools=>Instantiate Component gives an error, and the instantiated version has no documentation.

History

#1 - 06/13/2012 07:07 PM - Daniel Crawl

same fix for 5535:

I updated ShowDocumentationAction: if the documentation is missing, try generating from the sources, and if that fails, try loading from the Kepler cache.

#2 - 06/13/2012 07:08 PM - Daniel Crawl

same fix for bug 5355, not 5535
