

Metacat - Bug #5619

metacat homepage Login anchor link not connected to id

06/05/2012 06:25 PM - gastil gastil

Status:	Resolved	Start date:	06/05/2012
Priority:	Normal	Due date:

Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	5619		

Description

On the metacat homepage or first-page, knb/style/skins/default/index.jsp, the (Login) link to #loginanchor goes nowhere because there is no id="loginanchor", at least not that I can find.

This may be due to the use of iframe.

Possible fix: change the link to #iframeloginboxclass"

This is trivial... unless a new user does not realize they can scroll down to log in.

History
