Bugzilla-Id:	5626		
Description			
When we run kepler in batch mode, it's good to know its status and other information.			
CAMERA has done something for it. Jianwu will check it.			

History

#1 - 07/26/2012 02:53 PM - jianwu jianwu

It turns out a future requirement for CAMERA to get the detailed status for batch execution. It will be like Kepler monitoring in GUI, showing running actor lists and other information. It needs Kepler.sh have a listener running, and a local application to interact with Kepler.sh.

Re-direct to 2.5.
