**Description**

The graph layout mechanism has a Configure Layout menu choice in Vergil. Perhaps Kepler should have this as well.

The primary issue is that the Configure Layout dialog allows the user to choose to layout attributes such as annotations.

The code is in ptolemy/vergil/basic/BasicGraphFrame.java

Bug #5442 fixed View -> Automatic Layout, but this is different, we also want View -> Configure Layout.

**History**

**#1 - 06/26/2012 11:56 AM - Daniel Crawl**

Done. Remove $HOME/KeplerData/modules/gui/configuration/uiMenuMappings_en_US.xml if it exists.

**#2 - 03/27/2013 02:31 PM - Redmine Admin**

Original Bugzilla ID was 5634
