

## Kepler - Bug #5638

### "Ok" behavior of Use Module Manager prompt doesn't do what it should when opening from Recent Files

<b>Bugzilla-Id:</b>	5638		
<b>Description</b>			
If you attempt to open a kar from File=>Recent Files=>yourKar.kar and you're in a suite that doesn't include needed modules, you get the unsatisfied module dependencies "Use Module Manager" prompt, from which you may select Force Open or Ok. If you click Ok nothing's suppose to happen, but instead you get the kar binary file contents in a kepler text editor.
