History

#1 - 07/25/2012 02:41 PM - Daniel Crawl

The module demo workflows are now in the actor library, and all XML files in these directories are parsed. The file outreach/workflows/data/geon/Transitions.xml was missing some end-tags and generated these errors when parsed. I fixed the file in the svn, but there is a copy in \$HOME/KeplerData/workflows/module/outreach/data/geon that you will need to fix manually.
