

Kepler - Bug #5675

new ProgressMeter demo workflows give errors when opening in sensor-view-0.9.0

08/10/2012 07:03 PM - Derik Barseghian

Target version:	sensor-view-1.x.y	Spent time:	0.00 hour
Bugzilla-Id:	5675		

Description

There are a few errors when opening these xml workflows beneath sensor-view-0.9.0, despite working in trunk, e.g.:

ptolemy.kernel.util.NameDuplicationException: Attempt to insert object named "init" into a container that already contains an object with that name.

Even though the workflow only contains one "init" PortParameter.

After a kepler restart, I was able to save a copy of this workflow from beneath sensor-view-0.9.0, and can then re-open this copy without error.

I don't know the cause. Maybe these moml's will have to be resaved using sensor-view-0.9.0, and the outreach test-patch release recreated.

History

#1 - 08/13/2012 11:55 AM - Derik Barseghian

I've saved the new ProgressMeter moml demos from beneath sensor-view-0.9, to get rid of errors like the above. I also had to simplify SinewavesWithTrafficLights.xml to get rid of a similar problem. I didn't track down the issue. I tried all other demo workflows(except for matlab workflows, and the webservice and REST demos, which refer to services that the DDBJ websites says are temporarily down) without problem.

#2 - 08/30/2012 05:34 PM - Derik Barseghian

Moving to 1.x.y target.
