Kepler - Bug #5680

after inline save, demo workflow disappears from tree

Description

When I open a demo workflow from the tree, change it and save, it disappears from its location.

If I then close this Kepler window, in another Kepler window the workflow sometimes shows up at the bottom of the tree, at the root level. This issue of items sometimes appearing at the root bottom has been a problem for a long time, I believe I have filed bug(s) elsewhere for it.

History

#1 - 09/11/2012 02:43 PM - Daniel Crawl

I checked in a fix; reassigning to Derik to check.

#2 - 09/17/2012 06:03 PM - Derik Barseghian

I'm not seeing them disappear now at r30693. Initially I did see the problem with the saved workflow appearing at the bottom of the tree, loose at the root level, but after deleting .kepler and KeplerData I haven't been able to replicate.
